harounayomikun@gmail.com

EXPERIENCE

Software Engineer, Allawee Inc

- Designed and Built the Customer Relationship Management (CRM) tool used by administrators to manage customers, resolve complaints, and keep track of important business insights. I used React Table to create accessible tables and Apex Charts for data visualisation.
- Built services as part of a mono-repo, such as an internal url shortener tool, cronjobs, and webhooks to save third-party data.
- Implemented server and client gRPC integration with protobufs in JavaScript and Go for faster communication between different services in our mono-repo.
- Worked on email template development with sendgrid and implemented automated email delivery with the sendgrid API.
- Wrote and built the website for external documentation to help engineers integrate our API services into their system.
- Participated in backend sprints to create new RESTful API endpoints and make adjustments to existing APIs.

EDUCATION

University of Lagos — Bachelor of Laws

2017 - 2022
