### EXPERIENCE

#### Software Engineer, Allawee

APRIL 2022 - PRESENT

Lagos, Nigeria

##### Achievements:

- Designed and Built the Customer Relationship Management (CRM) tool used by administrators to manage customers, resolve complaints, and keep track of important business insights. I used React Table to create accessible tables and Apex Charts for data visualisation.
- Built services as part of a mono-repo, such as an internal url shortener tool, cronjobs, and webhooks to save third-party data.
- Implemented server and client gRPC integration with protobufs in JavaScript and Go for faster communication between different services in our mono-repo.
- Implemented RESTful API endpoints which involved processing third-party integrations on the serverside.
- Worked on email template development with sendgrid and implemented automated email delivery with the sendgrid API.
- Introduced Go to the mono-repo for greater performance in key services.

#### Software Engineer Intern, Allawee

FEBRUARY 2022 - APRIL 2022

Lagos, Nigeria

##### Achievements:

- Wrote and built the website for external documentation to help engineers integrate our API services into their system.
- Participated in backend sprints to create new RESTful API endpoints and make adjustments to existing APIs.
- Worked with PDFKit to edit a PDF document that was to be created and served over the web.

- Participated in frontend sprints to design and build a Customer Relationship Management (CRM) system that was used to monitor customer actions and resolve complaints.

## PROJECTS

### [Learn Nigerian Law](#)

SEPTEMBER 2021

Lagos, Nigeria

Learn Nigerian Law is a website that contains articles on different Nigerian legal topics. It was my idea, which I worked on with another frontend developer and a user interface designer. I built the landing page and several components that formed key pieces of the website. The technology behind it was React and Nextjs. Thousands of students have used the website since its creation.

## SKILLS

Core languages: Typescript/JavaScript and Go.

Familiar languages: Solidity and Python.

Core frameworks: React, Nextjs, Express, Nestjs, Gin.

Familiar frameworks: Vue, Nuxt, Angular.

Core databases: Mongo, Redis, Rabbit MQ.

Soft Skills: Communication, writing, presentation, learning.
