  guide individuals navigating the clime
- Collaborated remotely with a team of over 10 individuals, in a company of over
  100 employees, to drive content creation.

PROJECTS AND ARTICLES

Portfolio
- I built my portfolio with React. Building the portfolio helped me become more familiar with creating responsive SPA with React. I implemented both light and dark modes, with a default state based on the visitor's browser and a toggle option.
- Code repository: https://github.com/Exalted100/My-Portfolio
- Live: https://exalted-portfolio.netlify.app/

Github Query App
- I used the GitHub API to create a web app that takes any GitHub username and recreates a single-paged profile with up to 20 projects.
- Code repository: https://github.com/Exalted100/github-query-app
- Live: https://github-query-app.netlify.app/

Shortly
- I used the Shrtcode API to create a webapp that takes any link and shortens it. I also recreated a landing page I found aesthetically pleasing.
- Code repository: https://github.com/Exalted100/url-shortner-app
- Live: https://exalted100.github.io/url-shortner-app/
